~PeopleHours~

Did you know.....

## Did you know that PeopleHours can produce Your gross Payroll & Billing reports?

**Were you aware that PeopleHours is able to produce reports for you detailing gross payroll or invoice values using the duty times that it records from officers booking on and off duty, and the use of these features is completely free?**

Once the system has been loaded with the pay and billing rules your company uses the system is able to produce pay and bill values by assignment or individual posts on an assignment using either the scheduled or actual times that the officers have recorded when booking on and off duty.

Using the system in this way removes the need for timesheets or 3rd party calculations using applications like Excel.

The reports can be produced either direct to paper to be passed to accounts departments or transmitted electronically directly in a number of different file formats to wherever they are needed.

*Were happy to do all the work to set this up for you should you wish to take advantage of this feature.*
